

Product Release Notice

RTX 2012 with Update 5

General Availability Release Date

June 6, 2016

Product Overview

IntervalZero announces an Update to RTX 2012, our 32-bit market-leading hard real-time software. This update release resolves a number of issues and can be downloaded [here](#).

Resolved Issues

RTX 2012 with Update 5 includes the following updates:

Product Activation

- Resolved an issue where the RTX licensing did not recognize a valid license at startup. (2586)

Subsystem

- Resolved an issue where the Structured Exception Handling (SEH) function `SetUnhandledExceptionFilter` would not get called, which caused SEH to not work as expected for applications built with Visual Studio 2008, 2010, and 2012. (2588)
- Resolved an issue where `GetSystemTimeAsFileTime` and `RtGetRtssTimeAsFileTime` returned significantly different values. (2595)
- Resolved an issue where the Real-Time Subsystem failed to start on Intel 6th Generation Skylake machines. (2596)

Activation & Licensing

The IntervalZero product licensing system allows for flexibility in how features are activated and deployed. Please [click here](#) for an overview of IntervalZero product licensing.

For additional information on deployment, refer to the *RTX Deployment Guide* located on the [IntervalZero Website](#).

Availability

RTX 2012 with Update 5 is available beginning June 6, 2016 through Partners and by contacting Sales: sales@intervalzero.com or (781) 996-4481. Downloads can also be found [here](#).

This release is provided as an updated version of the full product. It will remove any previous RTX versions found on the system.

Feedback

We look forward to your comments and feedback. If you have any recommendations or wish to suggest any product enhancements, please contact Product Management at: productmanagement@intervalzero.com.
